

t_cose 2.0 project

IETF 118 Hackathon

https://github.com/laurencelundblade/t_cose

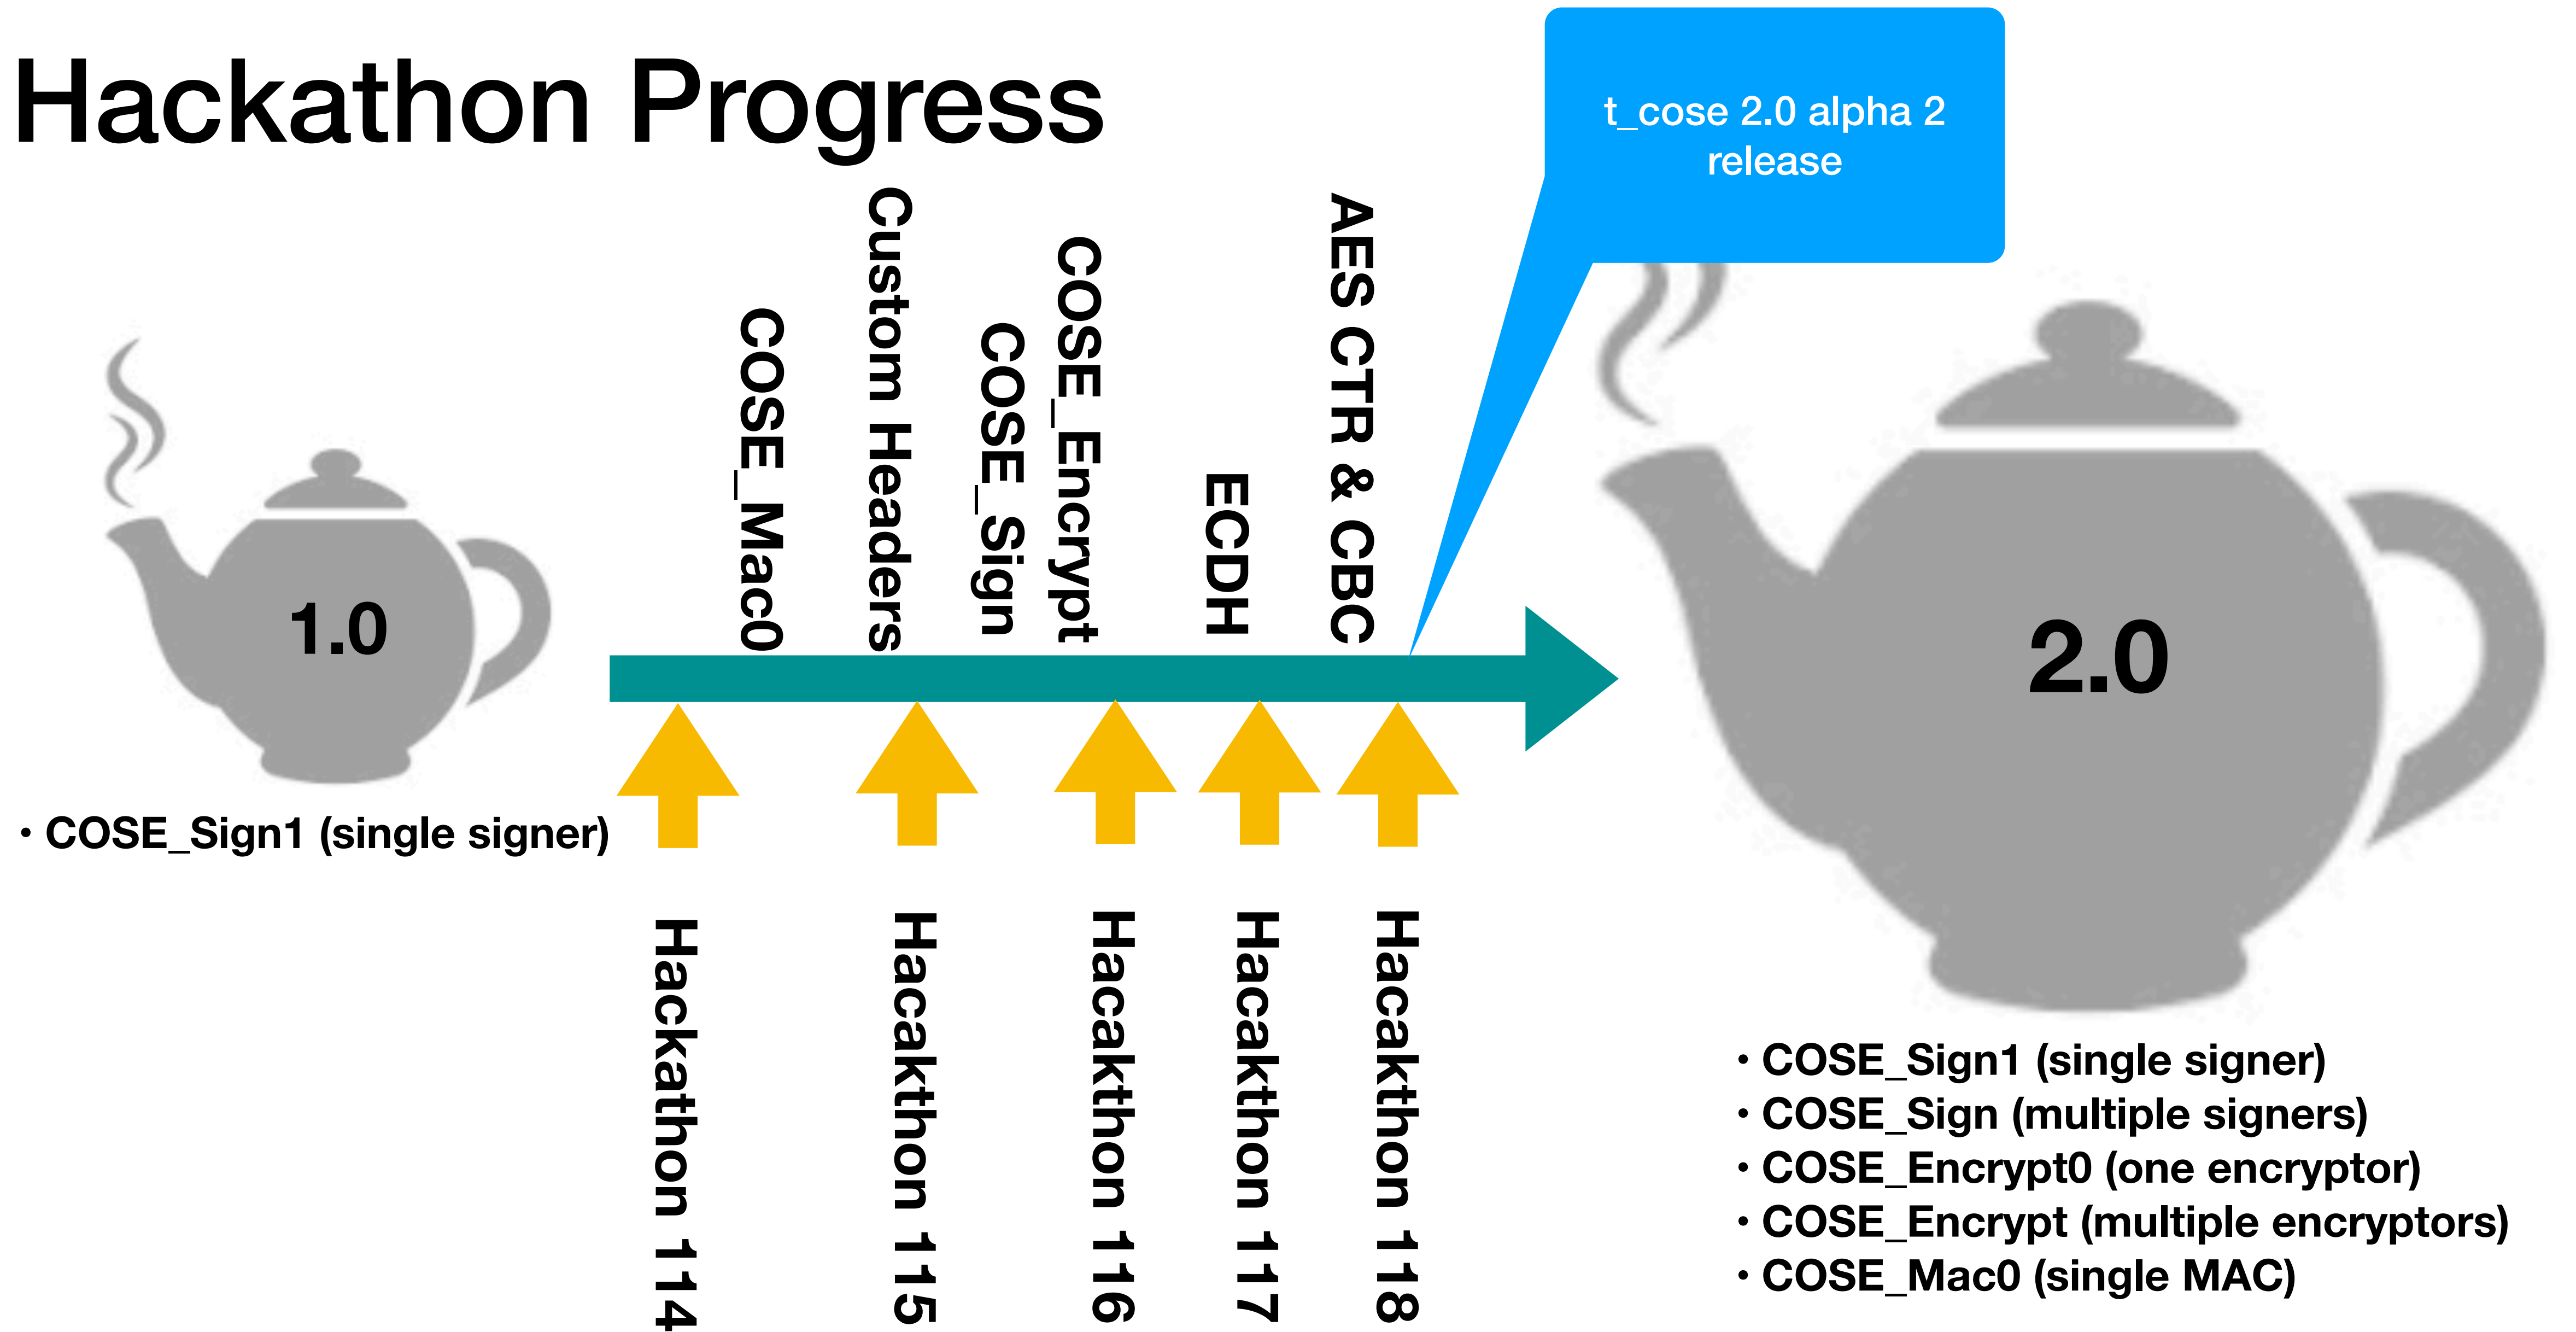

- `t_cose == "Trusted-COSE"`
- C implementation of COSE, RFC 9052, RFC 9053, RFC 9459
- Suited for IoT, embedded — small use of memory
- Commercial quality
- Works with OpenSSL or Mbed TLS crypto libraries

COSE NON-AEAD Encryption

- Add support for AES CTR and AES CBC modes
- Continue work on test and documentation
- Workers: Ken Takyama, Laurence Lundblade
